HP 4-in-1 SFF (2.5in) HDD Carrier

B8K60AA

Introduction

The 4-in-1 SFF Carrier allows for the installation of up to four 2.5" devices (HDD or SSD, SATA and SAS, max height 15mm). This carrier fits into a standard 5.25" external device bay and supports 6Gb/s operation (SATA and SAS).

Performance and Features

This carrier features four removable trays, designed to load and unload into the carrier tool-free. The carrier also features two 40mm rear cooling fans to aid in thermal management. This device requires two 4-pin Power connectors, and provides four SATA signal headers (7-pin). Front LED indicators are used to display power (Green) and Drive activity (Amber).

Overview

Compatibility

This carrier is compatible with HP Z620 and Z820 Workstations, and may be compatible with other Workstations using the standard 5.25" external device bay.

For the Z820, it can be installed in the middle and lower 5.25" bays. It cannot be installed in the upper 5.25" bay due to interference with the power cabling.

For the Z620, it can be installed in the both 5.25" bays. There is limited space to route the data cables when added to a dual processor Z620 system. Additional cable options are planned to support these needs.

Additional controllers may be required to support the additional drives located in this carrier.

Technical Specifications

Dimensions (L x W x H)	6.70 x 5.75 x 1.63 in
Kit Contents	Drive Carrier, Drive trays (4), Power adapter
Weight	1.77 lbs
