

True Interactivity for Bringing People Together

With differentiated cutting-edge touch technology, the TR3BF Series supports Dual Pen & multi-touch functions providing accurate drawing and authentic touch quality. In addition, the Air Class and web browsers support multi-directional communication and interactive learning, which will help you achieve the successful business.

Picture Quality

Dual Pen & Multi Touch

The TR3BF Series can simultaneously use up to 20 points of multi-touch and 10 points of writing, as well as 2 types of stylus pens. This dual pen and multi touch offer a lifelike board writing experience and make collaboration much easier.

Palm Erasing

The TR3BF Series allows you to easily erase texts, pictures, etc., written on the screen by using your own hands. This is not only easier than erasing with the stylus, but also makes you feel more natural, like you're erasing a real whiteboard.

Air Class

Air Class supports connecting up to 30 students and offers interactive meetings for all mobile devices on the same network, providing a variety of tools such as voting, answering, and sharing project texts.

Screen Sharing

The TR3BF Series allows you to share screens and content with laptops and other mobile devices. This makes meetings and classes as efficient and immersive as possible.

Built-in OPS Kit

The TR3BF Series supports OPS slots, allowing you to easily and conveniently mount OPS desktop at the back of the digital board without the hassle of connecting to an external desktop, offering you more expanded functions.

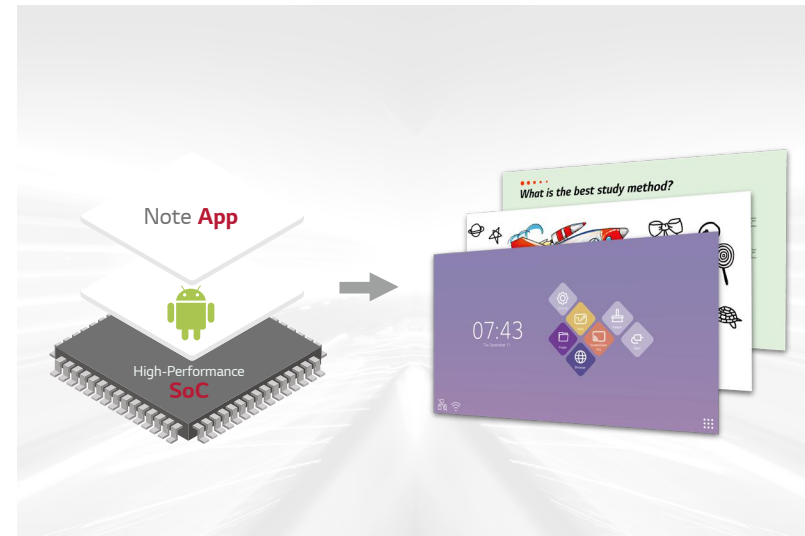

Web Browser

The TR3BF Series supports the Chrome web browser in the Android OS, so you can search the web easily and quickly, without connecting to an external desktop.

All-in One

The TR3BF Series integrates both Android and Note Apps into a high performance SoC, without a PC.

True Color, Immersive View

The TR3BF Series shows multimedia content to the attendees more vividly. The IPS panel clearly displays content at various angles, regardless of where attendees are sitting. Each pixel of the IPS panel reproduces the actual color of the image without any distortion.

Various Size with Ultra HD

The UHD resolution will show you details at a resolution that is four times higher than FHD, even when zoomed in. Various documents, images, and videos can be displayed without any distortion of the image which is especially important in an educational and collaborating environment.
