## Fujitsu PalmSecure Mouse Login Kit Input Device

For maximum security

---

Fujitsu's highly secure and easy to use PalmSecure PC Mouse STD captures an individual's palm image with a near-infrared light. The user simply places the palm of the hand above the sensor, which captures a unique image the blood flowing in the user's veins. Once that image is captured you can securely login with just your hand.

### Security

- Highly secure biometric solution through palm vein authentication. It provides a powerful combination of strong biometric authentication for log-in security, access management and data protection for both client and enterprise environments.

### Usability and Ergonomics

- PalmSecure is effortless to use. Simply hold the palm over a small infrared scanner and within a second the identity is verified. Because the system is contactless it is completely hygienic.

### Space Saving

- Since the Fujitsu PalmSecure Sensor is built into an optical mouse it economizes on desktop clutter since no additional equipment is needed.
