

# HyperX Savage DDR4 Memory

HYPERXGAMING.COM

## Low latency and fast speeds deliver superior performance.

HyperX® Savage DDR4 memory offers an unbeatable combination of fast speeds and aggressive timings to complement Intel's 2, 4, 6 or 8 core processors for faster video editing, 3D rendering, gaming and AI processing. With speeds of up to 3000MHz and latencies of CL12-CL15, it's optimised for Intel's Z170 & X99 chipsets and features easy overclocking with no need for manual timing adjustments in BIOS.

Available in single modules and kits of 2, 4, and 8 and in capacities of up to 64GB, HyperX Savage DDR4 memory has lower power consumption than DDR3, with 1.2V or 1.35V only for all parts. Its asymmetrical, stylish, die-cast aluminium heat spreader has a low profile to fit under oversized CPU coolers and provide enhanced thermal dissipation to keep your system cooler as it complements the look of the latest PC hardware and helps you stand out from the "square" crowd. The black heat spreader and matching PCB are made from quality aluminium material and feature a diamond-cut finish.

Attack the competition with style and confidence. HyperX Savage is backed by a lifetime warranty, free technical support and legendary reliability.

- 
- > Speeds of up to 3000MHz and low latencies deliver exceptional DDR4 performance
  - > Intel XMP-ready profiles are optimised for Intel Z170 & X99 series motherboards
  - > Lower power consumption than DDR3
  - > Asymmetrical, stylish die-cast aluminium, low-profile heat spreader

# HyperX Savage DDR4 Memory

## FEATURES/BENEFITS

- > **Low latency for exceptional DDR4 performance** — An unbeatable combination of fast speeds and aggressive timings to complement Intel's 2, 4, 6 or 8 core processors, HyperX Savage DDR4 offers speeds of up to 3000MHz and latencies of CL12–CL15
- > **Optimised for Intel's Z170 and X99 chipsets** — Built-in Intel XMP profiles allow users to easily overclock their platforms simply by selecting a profile, with no need for manual timing adjustments in BIOS. HyperX Savage DDR4 is available in single modules and in kits of 2, 4 and 8, with capacities of up to 64GB
- > **Lower power consumption compared to DDR3** — HyperX Savage DDR4's lower power requirement means less heat and higher reliability. At a low 1.2V or 1.35V, Savage DDR4 takes full advantage of the power efficiency brought by DDR4
- > **Die-cast aluminium heat spreader** — The high-quality die-cast aluminium heat spreader features an asymmetrical design and diamond-cut finish. It provides enhanced thermal dissipation for improved reliability, and its low profile fits well under oversized coolers

## SPECIFICATIONS

- > **Capacity** 4GB–8GB (single), 8GB–64GB (kits)
- > **Frequency (speed)** 2133MHz, 2400MHz, 2666MHz, 2800MHz and 3000MHz
- > **CAS latency** CL12–CL15
- > **Voltage** 1.2V or 1.35V
- > **Operating temperature** 0°C to 85°C
- > **Storage temperature** -55°C to 100°C
- > **Dimensions** 133.35mm x 32.8mm
- > **Compatible** with X99, Z170, H170, B150
