i-tec USB4 Metal Docking station Dual 4K  
HDMI DP with Power Delivery 80 W + i-  
tec Universal Charger 112 W

### PRODUCT DESCRIPTION

This product is a product set of a [docking station](#) and a [universal charging adapter](#). By purchasing this kit, you get a complete solution that allows you to easily connect your favorite accessories, including LAN and external monitors, as well as easily and conveniently charge your devices (including your laptop or tablet).

### DOCKING STATION

The latest and fastest generation of USB technology is finally here. The most powerful USB docking station, super-fast data transfer and support for up to 8K\* resolution.

Crystal clear image quality, fast internet and the ability to transfer data at speeds of over 1GB per second even when using multiple USB ports simultaneously. You can also, of course, connect your headphones or audio and charge your laptop (80W), all using one single cable.

Thanks to the integrated DP 1.4 protocol, you can connect this dock to a monitor with a resolution of up to 8K (7680 x 4320)\* with a refresh rate of 30 Hz, which is equivalent to the resolution of four monitors, each at 4K resolution. This makes it the ideal solution for graphic designers, analysts, developers, film editors, or high-definition video enthusiasts and lovers. Since USB4 technology is backwards compatible, you can connect this dock not only to laptops and tablets with USB4, but also Thunderbolt™ 3/4 and USB-C (must support video transfer). This makes the dock an ideal and flexible solution for businesses and users who run laptops and tablets with different ports.

\* 8K resolution must be supported by the connected laptop or tablet.

Please note: macOS only supports one external monitor

### UNIVERSAL CHARGING ADAPTER

This universal USB-C power adapter with up to 112W is an excellent choice for powering any laptop or other device with a USB-C connector that supports USB-C Power Delivery with a maximum required power of 100W. Another advantage of this adapter is the additional USB-A output (5V, max. 2.4A), which can easily be used to power most devices with USB charging (e.g. MP3 players, Bluetooth hands-free, digital frames, most Android mobile phones, Apple iPhone, iPad, iPod, navigation, etc.). The power adapter is lightweight and easy to carry; it has intelligent protection against overcurrent, overvoltage, short circuit and overheating.
